ACTA MECHANICA SOLIDA SINICA

LIST OF CONTENTS

1992

Experimental study and BEM analysis of fatigue crack growth in a cracked heterogeneous body ..... DA–CHENG SUN and XING–RUI MA (1–1)

Simulation of spallation in brittle solids ... ZE–PING WANG, FENG–LEI HUANG and SHOU–RONG YUN (1–13)

Error estimation of Gaussian closure for quasi–linear systems ..... WEN–YAO JIA and TONG FANG (1–27)

Shape sensitivity analysis of elastic structures by multi–domain boundary element method ..... TONG–RU HUO and QING–HUA DU (1–35)

Numerically simulating crack growth with a "moving tip node" finite element ..... FANG CAO, JING–YU ZHANG and YAN–QUN WANG (1–47)

The coupling of stochastic BEM and stochastic FEM with application in the reliability analysis of pile foundation ..... GU–NING PAN, TONG JIANG and ZU–DE LIU (1–65)

Some applications of semi–analytical finite element method in static and dynamic analysis of structures ..... ZHEN–HAN YAO (1–75)

A boundary integral equation formulation for the Reissner's plates resting on two–parameter foundation ..... JIAN–GUO WANG, XIU–XI WANG and MAO–KUANG HUANG (1–85)

Stress function method in shakedown analysis of axisymmetric shells ..... MING–WANLU and SHAO–ZHONG CHEN (1–99)

A directed rood subjected to internal constrants ..... QUAN–XIN SUN (1–111)

The variational principle of structural analysis for damage–coupled elastoplastic creep problem ..... PAN ZENG and XUN–FANG SUN (2–125)

A direct representation of the rotation tensor in polar decomposition of deformation gradient and its applications ..... WEN–BIAO WANG and ZHU–PING DUAN (2–135)

The singularity behavior of an interface crack under a dynamic load ..... XIAO–DONG WANG, ZHEN–ZHU ZOU and DO WANG (2–147)

The distributions of the interlaminar stress in a laminated shell with free end boundary ..... XI WANG and SI–JIAN LI (2–159)

The resonance of a vertical rotor containing a transverse crack

..... JIAN–MIN GAO and XIAO–MEI ZHU (2–167)
On the connections between the functionals of equivalent variational principles
..... HAI–CHANG HU (2–175)
The influence of a rate sensitive effect of material for a propagating crack–tip field
..... FAN–CHUN LI (2–183)
A model of dynamic failure in ductile materials
..... ZE–PING WANG and MIN HOU (2–193)
Analogy solutions of axisymmetrical twist problems by axisymmetrical finite element program
..... SHENG–NIAN QU and CHENG–GUANG DENG (2–203)
A new hybrid stress element method for the analysis of elastoplastic solids
..... WAN–JI CHEN and PEI–RAN DING (2–219)
A study on the damage evaluation of weld heat affected zone
..... ZHI–WEN LOU, TIE–JUN WANG and JIAN–ZHENG ZUO (2–235)
Asymptotic fields for interface crack in elastic–plastic material
..... LIN XIA and TZU–CHIANG WANG (3–245)
Near–tip temperature distribution for mode III stationary crack in power–hardening materials ..... XUE–JUN FAN and SHOU–WEN YU (3–259)
A catastrophe model for the impact torsional buckling of elastic cylindrical shell
..... DE–YU WANG and GUI–TONG YANG (3–269)
The effect of large rotation on post–buckling of annular plates
..... CHANG–JUN CHENG and XIN–CHUN SHANG (3–277)
Passive damping of prestressed composite structures
..... C.T.SUN, V.S.RAO and B.V.SANKAR (3–285)
Experimental investigation on the vibro–compacted of RCC
..... ZHU–GUANG OU (3–301)
Research on establishing BEM of thin plates with Kelvin's fundamental solution
..... GUO–YING ZHENG and XING JI (3–311)
Traction discontinuity problem in 3D BEM of the transversely isotropic material
..... ZHONG–KUI LI, ZHEN–SHENG CHEN and H.A.MANG (3–323)
A constitutive equation of elastic–visco–plasticity for polymers
..... TING–QING YANG and JI–YANG YU (3–335)
A boundary element solution to scattering of elastic SH wave by arbitrarily shaped inclusions embedded in an infinite anisotropic medium
..... WEI–FANG ZHONG and QIN LIN (3–343)
A generalized Adadorov theory for anisotropic thin–welled beams
..... XI–XIAN WU and TSU–TAO LOO (4–361)
On the two basic problems of complex damping theory
..... JING–QING ZHU (4–381)

An application of the non–singularity BEM to plate bending, buckling and natural vibration problems ..... XIAO–YING LIU and MENG–SHI JIN (4–391)
A new approach of the dynamic substructure method
..... ZHAO–CHANG ZHENG and GENG XIE (4–407)
Elastoplastic stress analysis for cylindrical shell with flat strip imperfection
..... XIN–TANG WANG and ZHAN–XIN MEI (4–419)
Discriminating on dynamical stability of biped walking
..... YUAN–ZONG LI and XUE–XIN WANG (4–433)
The future role of experimental mechanics in international aspects
..... K.H. LAERMANN (4–443)
Theory and duality of elasto–perfectly plastic material
..... SEN–TIAN DU and HAN–BING LIU (4–453)
Optimum design of composite laminates
..... CHENG WANG and WEN–BING YANG (4–465)
A method of parametric quadrature programming for the problem of osmosis–solidification in elastoplastic rock–soil medium
..... PAN ZHEN and LING–XI QIAN (4–473)
List of contents 1992 ..... (4–487)
